

TRUMPET HORN 22 INCH

Description-: The 22-inch Trumpet (Reflex) Horn is a high-performance horn speaker designed for large coverage outdoor and indoor public address systems. With a substantial 22-inch bell diameter, this horn enables excellent sound projection, ensuring that announcements, alerts, and vocal messages carry clearly across long distances.

Key Specification-:

- A 22-inch flare or bell gives the horn a large mouth, enabling it to project sound over longer distances with better low-frequency handling.
- Many 22-inch horns are made of heavy-duty aluminum, which gives durability with not too much weight, plus good resistance to outdoor conditions.
- A 22-inch horn typically has a throat or mount interface (often standard T.P.I. threading like 18 TPI or similar) so that many compatible compression drivers.
