

## PG-026 SPEAKERS

**Description:-** The Penza PG-026 is a compact, durable, and efficient wall-mount speaker designed for professional audio distribution in both indoor and outdoor applications. With a rated power of 30 W, this model is well-suited for environments that require reliable sound.

### Key Specification:-

- Designed for distributed systems where long cable runs.
- The 6-inch speaker gives a decent mid-low response, balancing compact size.
- Rated at 30 W, making it suitable for low to medium sound levels such as announcements or background music in smaller areas.
- Relatively efficient for its class; helps in getting clear sound without needing a very powerful amplifier.
