

PV-30 VOLUME CONTROLLER

Description:- The PENZA PV-30 is a reliable and cost-effective solution when fine control over zone volume is required in 100V distributed audio systems. Its stepped dial, clean design, and ease of installation make it particularly well-suited for commercial environments.

Key Specification:-

- Comes with a universal wall mounting box to accommodate both surface-mount and flush-mount setups.
- Use in background music systems, multi-room, public address systems in hotels, churches, schools, or retail spaces where local volume control is beneficial.
- Fits standard EU flush-mounted electrical boxes.
- Made of ABS plastic with a white finish.
