

SS-02 STAND

Description-: The Edifier SS02 Speaker Stands are a premium accessory designed to elevate your bookshelf or monitor speakers—specifically the Edifier to their optimal listening height, enhancing both audio performance and aesthetics. Standing approximately 25.6-25.7 inches ($\approx 648-652$ mm) tall, these stands help position your speakers.

Key Specification-:

- The SS02 stands are about 25.6–25.67 inches ($\approx 648-652$ mm) tall. This lifts compatible speakers to roughly ear level for a seated listener.
- The stands are constructed from MDF (Medium Density Fiberboard) with a wood grain finish. Some variants offer textured or brown wood-grain finishes.
- The stand is hollowed internally, allowing filling with sand or other material to increase mass and damp vibrations/resonances.

Features-:

MODEL NO.	SS-02 STAND
Model	SS-02 Speaker Floor Stand
Type	Height-adjustable metal satellite speaker
Material	Steel / heavy-mass steel construction with matte black finish
Height Adjustment	25.67 inches (≈ 652 mm)
