

TB-22 CABLE

Description-: This is an insert cable, generally used for audio consoles or other preamps that have a send/return on the tip/ring of a 6.35mm TRS jack. It's a way to insert a component directly inline with a preamp by using a single 6.35 mm large jack.

Key Specification-:

- Oxygen-free copper (OFC) conductors for enhanced signal clarity, OFC spiral shield for effective EMI and RFI rejection and flexibility.
- This cable is designed to connect gear with balanced phono output to gear with same input.
- This is specially designed to meet all your audio connection needs.
- Heavy Duty Gold-plated 6.35mm connector resist corrosion, provide durability
