

PCO-07 SPEAKERS

Description:- The PCO-07 column speaker is a compact yet powerful solution designed for public address and background music applications. As part of the PCO series, it is engineered to provide clear and intelligible sound in environments where speech clarity is essential.

Key Specification:-

- Aluminum extruded body, with molded plastic covers and metal mesh grille.
- Slim, compact, aesthetically designed column speakers.
- More full-range drivers or larger drivers; better tweeter for clarity at high frequencies. This would help improve sound quality, especially for voice and music.
- Better brackets, lighter weight, more compact design for easier mounting; improved aesthetics.
