

PDF12V3 Audio-Mixer

Description-: The **Penza PDF12V3 Professional Audio Mixer** is a versatile 12-channel audio mixing console engineered for live sound, studio recording, events, and DJ setups. It delivers clear, balanced audio with comprehensive control over inputs and outputs. Built-in DSP effects, flexible input options, and a durable design make the PDF12V3 ideal for both live performance and recording environments.

Key Specification-:

- 12 Independent Input Channels — Supports mixing of vocals, instruments, and line-level sources with ease.
- Built-in DSP Effects — On board digital effects enhance sound quality without needing external processors.
- 3-Band EQ per Channel — Fine-tune tone for each input for precise control.
